MAINTENANCE AGREEMENT

Streamline Pools Maintenance routes were started to take away the day to day hassles of pool maintenance. By doing so we had to set certain guidelines for our relationship to be based upon. Each customer's rate is based on a full year's participation. Our policy is to pre-bill for our service each month. It is important that these payments be made in a timely fashion.

Our weekly maintenance route consist of the following: (Weather Permitting & Holidays)

- Vacuuming pool when needed
- Emptying pool skimmers and pump baskets
- Brushing walls, steps and benches
- Skimming surface of water for debris
- Adjusting chlorine and pH levels
- Backwashing when needed (when filter pressure is up 8-10lbs.)
- Informing customer of any work done, when it is safe to swim and when the pool needs to be filled with water.

**Any needed service or repairs, such as filter cleans, salt cleans, pump & skimmer baskets, cleaner bags, etc, will be billed in addition to your regular monthly maintenance ...*unless under warranty*. Six month filter cleans are very important! Filtration is the key to keeping your pool clean.

You will be left a door hanger each time your pool is cleaned. As long as each of us follows these guidelines, we are sure to have a long and successful relationship.

I understand that this is not a contract, nor is it binding in any way and I hereby agree to the above guidelines. I also understand that if either party fails to fulfill their portion of the agreement, that all services may be discontinued with Thirty days written notice.
